

ST1 Compact Flame Surface Treater

Cure Systems LLC

"Your Flame Systems Specialist"

ST1 Flame Treater

Introducing our single burner, versatile, compact High Velocity Flame Surface Treater.

The ST1 model shown was originally developed for use in assisting cold glue operations on paperboard as the substrates became increasingly more difficult to bond. It did not take long to realize just how versatile, convenient and effective this system is.

This multipurpose system can be used on a variety of processes, substrates and industries, burner shapes and sizes. Unit is portable, move with 2-wheel cart, operates on any 120V outlet and uses natural gas or propane fuel.

Chances are that if you are incurring cost having personnel prep part surfaces to accept bonding agents or losing time & money due to poor or outdated surface treatment levels, you should consider the ST1.

Contact us today for more information on the ST1 or for pricing and availability.
